Dear George & Jeff:

12-10-08

Thank you for your recent support of the energy makeover held at the Angelheart Children's Shelter on November 1st, 2008.

Angelheart Children Shelter, an Austin-based safe haven for abused and neglected children received a complete energy home make-over thanks to several area businesses and organizations, including yourself. Angelheart Children's Shelter has been battling electric bills nearly equal to their mortgage payment each month. However, with the help of AAFAME and BOMA Austin, they received a home energy make-over.

This worthwhile endeavor allowed both groups an opportunity to make a real difference in people's lives in a very concrete way, saving the organization money and making this home more affordable and comfortable. By improving the home's energy efficiency, we estimate it will save this organization as much as 25 percent a year, which could equate to about three months of energy use annually in operating cost, allowing Angelheart to use this money in other crucial areas.

An energy audit was performed on the 1970's ranch-style home by industry professional. Based upon the findings, volunteers and others donated not only their time but also materials, including: a new high-efficiency air-conditioning unit, new energy efficient washer/dryer set, new doors and windows and incandescent light bulbs with new compact fluorescent lights. A few of the other tasks being performed on the shelter are: weather-stripping around the exterior doors, insulating outdoor power outlets and sealing windows with protective foam or caulk.

With your contribution and all our other volunteers we will make an impact on the lives of the children at the shelter.

Sincerely,

Amy Ables
Executive Director
